

ISINGLASS POND

Limington and Waterboro Twps., York Co.
U.S.G.S. Limington, Me. (7.5')

Fishes

Brook trout	White sucker
Yellow perch	Hornpout (bullhead)
Chain pickerel	Pumpkinseed sunfish
Minnnows	
Golden shiner	
Creek chubsucker	

Physical Characteristics

Area - 30 acres

Maximum depth - 25 feet

Temperatures:

Surface - 74°F

24 feet - 42°F

Principal fisheries: Brook trout and chain pickerel

Isinglass Pond is located west of Rt. 117 in Waterboro. Water quality at Isinglass Pond is well suited for coldwater species such as brook trout, but large numbers of competing species such as perch and suckers preclude intensive trout management. Therefore, the pond is stocked annually with catchable-size brook trout and provides a good seasonal fishery.

There is not a public access site, but walk in access has been traditionally granted across private property along Rt. 117.

Surveyed - September 1960
